1

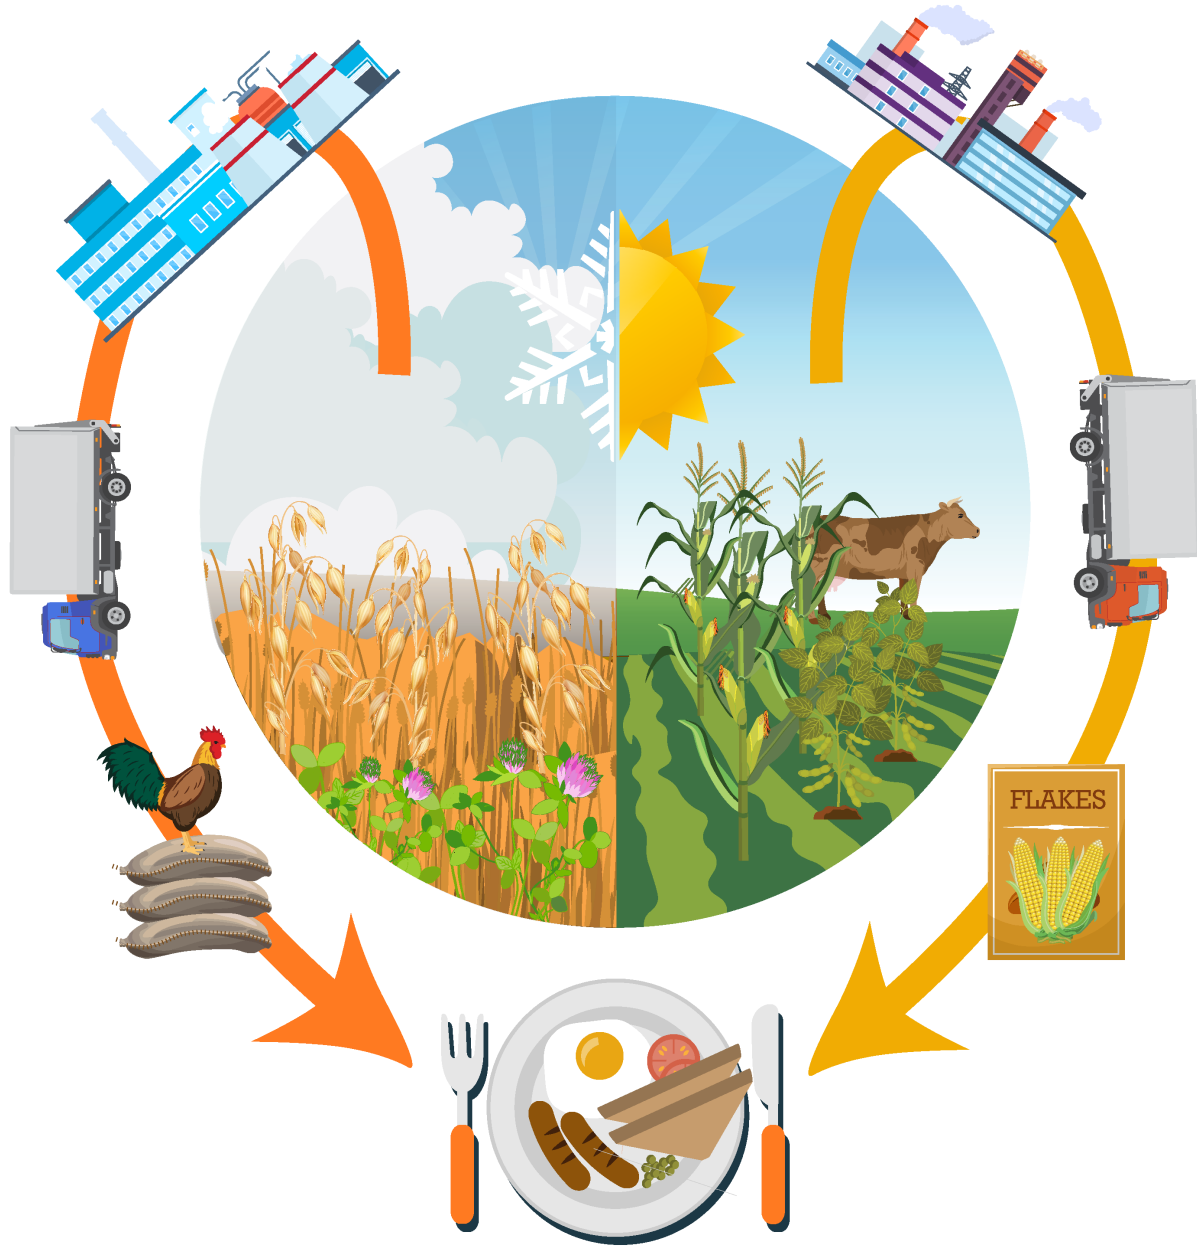

Collaboration to build markets for diverse rotations

- Feeding more than just corn and soybeans
- Grazing cover crops
- Cover crop seed markets
- R&D for product development that uses soil friendly crops

2

Investment beyond check-lists

- De-risk practice change
 - investing in adaptive knowledge networks
 - changing trading relationships to support long-term investment in farming communities

“the essential wisdom accumulates in the community as much as fertility builds in the soil, in both death becomes potentiality.” ~ Wendell Berry
